

## Federal Tax Credits

Water Heater Incentives | Effective Dates: January 1, 2023 – December 31, 2032

Beginning 2023, the expanded version of 25C, now called the **Energy Efficient Home Improvement Tax Credit** (under the Inflation Reduction Act of 2022), provides a **maximum credit of \$1,200** annually for most taxpayers. It is **\$600 for any single energy property item** (including Tankless Water Heaters and Boilers) with an **additional credit capped at \$2,000**, for qualifying expenditures on biomass stoves or water heaters and/or heat pumps powered by propane or natural gas. Unlike the existing program, the expanded 25C tax credit has generous annual limits (not lifetime limits), meaning that the same customer could receive the credit for qualified energy efficient upgrades annually. This expansion will extend the program out to 2032.

*Note: Qualifying water heating products and corresponding credit limits are based on finalized CEE (Consortium for Energy Efficiency) highest product category tiering as of 12/20/22. Rinnai will communicate details on any changes to the qualified equipment list as new information becomes available.*

**SENSEI**

### HIGH EFFICIENCY GAS WATER HEATER CATEGORY

Gas Fired Tankless Water Heater - Rinnai SENSEI™ RU / RSC (RUR) Series

Previous Water Heater/ Replacement Scenario	Qualifying UEF Based on Highest CEE Tier	Energy Efficient Home Improvement Tax Credit
Standard Gas	≥ .95	30% of product + installation cost, up to \$600

Gas Fired Condensing Boilers - Rinnai I-SERIES

Previous Water Heater/ Replacement Scenario	Qualifying UEF Based on Highest CEE Tier	Energy Efficient Home Improvement Tax Credit
Standard Gas	≥ .95	30% of product + installation cost, up to \$600

**I-SERIES**
